UNIT 10 – FINAL TASK

Design your own worksheet, activity or game in which young learners could practice sound YOU CHOOSE.

- If you decide to make a worksheet, make sure it is simple, visual, and easy-to-use.
- If you decide to invent a game or activity, make sure the instructions are simple enough for young learners to follow.
- It is a good idea, rather than inventing an activity or a game yourself, to adapt an existing activity or game, especially one that your learners will already know how to play, such as *tic-tac-toe*.

As a teacher, you will find that there are plenty of resources available to you online and from publishing houses. But it is always good to be able to design your own resources whenever you need to too.

Design, at least, one activity. You can also design a complete worksheet with several activities.

Send a WORD/PDF document with the answers.
